DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 12-15 are rejected under 35 U.S.C. 101 because

Despite the express language of §101, several judicially created exceptions have been established to exclude certain subject matter as being patentable subject matter covered by §101. These exceptions include “laws of nature,” “natural phenomena,” and “abstract ideas.” See Diamond v. Diehr, 450, U.S. 175, 185, 209 USPQ (BNA) 1, 7 (1981). However, courts have found that even if an invention incorporates abstract ideas, such as mathematical algorithms, the invention may nevertheless be statutory subject matter if the invention as a whole produces a “useful, concrete and tangible result.” See State Street Bank & Trust Co. v. Signature Financial Group, Inc. 149 F.3d 1368, 1973, 47 USPQ2d (BNA) 1596 (Fed. Cir. 1998). The Manual of Patent Examining Procedure reiterates this point. More specifically, MPEP 2106(II)(A) states, “The claimed invention as a whole must accomplish a practical application. That is, it must produce a ‘useful, concrete and tangible result.’ State Street, 149 F.3d at 1373, 47 USPQ2d at 1601-02.” In this case, the claims merely recite a series of abstract ideas, which together form a mathematical algorithm per se. There is no practical application recited in the claims i.e. how would you evaluate cooperation; the robots are not used in a physical way and nothing is being made, the claim merely recites “providing a robot”; by performing the method there is no evidence of a concrete, tangible results and there is no physical transformation. Therefore, the claims are not eligible for patent protection.

Response to Arguments

Applicant's arguments filed 26 September 2006 have been fully considered but they are not persuasive. As indicated above the claimed invention as a whole must accomplish a practical application. Applicant merely recites a series of abstract ideas, which together form a mathematical algorithm per se. As indicated above there is no practical application recited in the claims i.e. how would you evaluate cooperation; the robots are not used in a physical way and nothing is being made, the claim merely recites "providing a robot"; by performing the method there is no evidence of a concrete, tangible results and there is no physical transformation. Therefore, the claims are not eligible for patent protection.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
